Cosima SMB is a complete business system for small and medium-sized businesses. It maintains customer rel. management (CRM), order / Invoice, inventory, accounting and more. Select your industry within Trade, Industry, Insurance, Consultant / IT and Membership organisations.

Cosima SMB increase efficiency by :

- Customer agreements can be of type periodical and products of stock.
- Products and stocks have unlimited structure and localizations
- Automatic invoice / OCR generation
- Customers connect to your value chains

When you experience our simple to use and well designed software you will also understand we also include a free self training course in your system setup.

You can find more details on Cosima.biz

When your business is growing and will double your turnover, as many of our customers do, we offer our Cosima SaaS GOLD agreement. It provides access to **Cosima ERP**, This is the big brother system for medium and large businesses with expanded functionality and usability.

In addition, we also offer our customers a self composed solution with our Cosima Platinum / Dedicated hosting agreement. You then make your own choice of server and system setup tailored to your demands and performance. This means you can secure best performance either in a virtual server or get a dedicated one. In addition you can also have the system tailored to optimize its behaviour specially to your business demands.
